DETAILED ACTION

Election/Restrictions

1. Claims 32, 35-36 and 40-52 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on March 20, 2006.

The examiner notes that even an election was made of paper or paperboard product and of acrylic in the ink receptive layer, the applicant has chosen to give all claims the status identifier of “new”. Claims 32, 35-36 and 40-52 are withdrawn and should have “withdrawn” as the status identifier. The applicant is requested to comply in their next response.

2. Applicant's election with traverse of claims 27-31, 33-34 and 37-39 in the reply filed on March 20, 2006 is acknowledged. The traversal is on the ground(s) that should the elected species be found allowable, the examiner should search the non-elected species. The applicant has also requested that if claims 27-39 are allowable that claims 40-52 be rejoined. This will be considered at the appropriate time.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 29 and 30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

“...ink receptive layer...and...base layer are not in contact...” is new matter that was not in the specification as originally filed.

The applicant is requested to cancel new matter.

5. Claims 27, 29-31, 33-34 and 37-39 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a paper or paperboard that has a basis weight of above 80 pounds per 3000 square feet, does not reasonably provide enablement for any weight of paper or paperboard. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

Art Unit: 1762

It appears from “Field of the Invention” and elsewhere in the specification that the claimed invention is to a paper or paperboard that has a basis weight of >80 pounds per 3000 square feet.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 39 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a) Claim 39, line 2: there is no antecedent basis for “material”.

Double Patenting

8. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1762

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

9. Claims 27-28, 31, 37 and 19 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6645642. Although the conflicting claims are not identical, they are not patentably distinct from each other because the subject matter of claims 27-28, 31, 37 and 39 overlap with the subject matter of claims 1-4.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
